<b>Photographer</b>	Jeffrey Totaro

Throughout the offices at Campbell's, color and custom hanging panels punctuate communal areas, shared workspaces, and meeting rooms with playful nods to the products (and snacks!) that Campbell's is most known for. Chips, pretzels, and the brand's iconic goldfish are sprinkled throughout the office through custom-cut hanging panels in a wide range of hues that add pops of color in a fun and collaborative environment. In private meeting rooms, wool felt lines the walls in saturated colors that play up the office's lively atmosphere while creating quiet, cozy spaces for head-down work.

Designed by architectural and design firm Jacobs, Campbell's offices exemplify the team's approach to sustainability. Natural materials, including our 100% Wool Design Felt, reaffirm the firm's commitment to creating a positive impact through every solution they provide their clients.
