At the Park & Pearl Residence in the Arts District of Dallas, the space includes hard surfaces aplenty including exposed ceilings, concrete, and cold rolled steel. Given these industrial finishes, the textiles provide some needed warmth and textural oomph. 100% Wool Design Felt covers the wall of two bedrooms in two rich, natural greys. To complement the walls, Custom Floor Coverings in the same natural wool hue feature hand stitching and built-in custom millwork bunk beds include custom felt bins in two grey shades and an unexpected pop of orange.
